

Free Fibre Optic Training Day 2010

Fibreplus Ltd. would like to invite your company (a maximum of two places), to attend a Fibre optic basic fundamentals training day which includes practical and theory, also fibre testing methods and equipment, dates can be provided by calling 01373 826634. or see attached calendar..

The day will cover theory of best practice in splicing and test and measurement. Also supplemented by additional support workshops to help increase and maximise your practical experience in the use of our products. The day will be divided into two sessions.

The morning will cover theory

- Basic understanding of fibre optic
- Basic understanding of fibre optic testing procedures and equipment
- Advice on which equipment should be used to meet you and your customers needs
- helping to understanding and solve problems you may experience understanding Loss testing and OTDR results
- **The afternoon launch event is a hands on session and will:**
- choose from one of the five workshops i.e. OTDR, Loss Testing, Fibre Identifier, Splicing and Cleaving,
- how to achieve good cleaves every time, good cleaves means good splicing understanding when bad cleaves are a user issue or a faulty cleaver
- achieving a good splice first time every time, understanding what the splicer is reporting
- best practice for loss testing, working on a 1km Multi-mode simulator or 14 km Single mode simulator how to get the most from your OTDR

WHO SHOULD ATTEND?

- IT Specialists, Decision Makers, Management, Buyers, Planning, Surveyors, Installers and Test Engineers.

WHY ATTEND?

- An understanding of fibre optics
 - Why not make the right decision when purchasing equipment
 - Increase productivity and reduce downtime
 - Extend your knowledge
- Understand product issues you have experienced in the past and possibly in the future
